

RemoR

BIO PUNCH

RemoR-a novel product containing botanical extracts from pongamia, croton bonplandianum, adhatodavasica, aristolachia indica ,that are having host plant resistance activities and characteristic bio-molecules within it. High efficacy ,non phytotoxicity,higher growth and yield are its distinctive features.

Mode of action:

The plants which are resistant to insect attack ,contains certain specific alkaloids which are not preferred by insects. These alkaloid compounds acts as natural defence mechanism to repel the insects by arresting the normal activities of insects.

Benefits:

These natural growth compounds strengthens root system,stimulates stem elongation,increases foliage,number of flowers and reduces flower drop leading to higher yield.

Effectively controls Lepidopterous,insects,caterpillars ,larvae moths skippers,leaf beetles,mites,leafminer,ticks ,bed bugs and whitefly preventing subsequent crop protection against pests & insects ,it forms protective layers on the leaves and makes the crop less attractive to pests & insects.

Safe to beneficial insects

Target Crops:

All cereals ,pulses, cotton,chilles,ornamantal crops, vegetables and fruit crops.

Dosage:

60 ml of remor /acre or 0.5ml of remor per litres of water

Available pack Size:

10ml,30ml & 60ml
