

REBOUND SPECIFICALLY FORMULATED TO BOOST INITIAL GROWTH OF PLANTS-CERTIFIED BY INDOCERT AN INTERNATIONAL ORGANIC CERTIFICATION AGENCY, INDIA.

Composition

REBOUND is an organic nutritional product containing vegetable proteins and minerals.

Mode Of Action

With plant extracts, Soya protein it gets absorbed through stomata and the nutrients being chelated totally absorbed through the foliage and gives strength and active physiological process.

Key Benefits - REBOUND

- ◇ It supports in improving plant growth, yield and quality of the produce
- ◇ Rebound free from chloride, sodium and other harmful elements for plants
- ◇ Rebound corrects micro nutrition deficiencies and boosting the yield
- ◇ It accelerates growth, increase flowering and fruiting, intensify color and provide resistance to disease, insects, drought & frost, make the produce attractive and marketable.

Physical Characteristics

AppearanceClear Reddish brown liquid

Specific Gravity.....1.02-1.06

pH.....6.0-7.0

Solubility in WaterFully soluble in water

Stability

Rebound is stable at under normal storage conditions for 3 years.

Packing & Presentation

250 ml, 500 ml 1000 ml HDPE/PEP bottles with aluminum was packed in 7ply corrugated carton box

Application Rate/Dose/Crops

Shake well before use, 1.5 to 2 ml of Rebound/liter of water for most crops.
