

**CREATED SPECIFICALLY FOR SPRAY DURING EXTERNAL STRESS
AND FOR GETTING ENHANCED GROWTH**

COMPOSITION

VEENUS Powder consists of fine homogeneous mixture of vegetable amino acids, vitamin, growth enhancer, humic acid, seaweed extract, natural organic manure and vermicompost.

KEY BENEFITS OF SPRAYING VEENUS

- It increases the root length
- Increase the internodes length
- It increases chlorophyll content of the leaf and food production
- Increases the flowering
- Induces more flower buds
- Improves the fruit shape and shinning
- Enhances the yield up to 20-30% over the normal yield

MODE OF ACTION

- Seaweed present in VEENUS contains; amino acids, long chain sugars, macro and micro nutrients, broad spectrum rare earth elements, and most importantly, plant growth enhanced. These ingredients have good biological activity, facilitate to stimulate internal unspecific active factors and regulate the balance of endogenous hormones
- VEENUS contains vitamins; it will stimulate amino acid metabolism and nucleic acid synthesis (RNA and DNA)

PHYSICAL CHARACTERISTICS

Description.....Ash to black color Powder

Moisture.....≥2%

Solubility in Water.....Complete

PH6.5-8.0

STABILITY

VEENUS is stable under normal conditions For 3 years.

PACKING AND PRESENTATION

250 grams, 500 grams, multi color baby carton in 7ply corrugated box.

APPLICATION RATE/DOSE/CROPS

Apply VEENUS through foliar spraying using enough water to thoroughly wet plants foliage as a whole.

VEENUS can be normally mixed with major fungicides, insecticides and foliar fertilizers.

General Foliar Spray Application: 1.5-2.5 gm/ Lit of water for fruit crops/vegetables/home gardens.
100-250 gm/acre.
